

Provider of Choice

# Early detection saves lives

**This is the key message that we  
need to put across to everyone!**

*Would you like to become a cancer champion,  
receive **free training**, a certificate and badge?*

Our cancer champions may have the opportunity to raise awareness and talk about the importance of early detection with their family, friends and social groups by providing information about symptoms of different cancers in an informal way.

It won't take lots of your time, but you will...

**Make a big difference!**
